CRIME FACTORS

Until data users examine all the variables that affect crime in our community, they can make no meaningful comparisons.

Consider other characteristics of a jurisdiction

To access criminality and law enforcement's response from jurisdiction to jurisdiction, one must consider many variables, some of which, while having significant impact on crime, are not readily measurable or applicable pervasively among all locales. Geographic and demographic factors specific to each jurisdiction must be considered and applied if one is going to make an accurate and complete assessment of crime in a particular locale. The Stat Data Center, for example, can be used to better understand the makeup of a locale's population. The transience of the population, its racial and ethnic makeup, its composition by age and gender, educational levels, and prevalent family structures are all key factors in assessing and comprehending the crime issue.

Local chamber's of commerce, planning offices, or similar entities provide information regarding the economic and cultural makeup of our island. Understanding a jurisdiction's industrial/economic base; its dependence upon neighboring jurisdictions; its transportation system; its economic dependence on nonresidents (such as tourists and business visitors); its proximity to military installations, correctional facilities, etc., all contribute to accurately gauging and interpreting the crime known to and reported by law enforcement.

The strength (personnel and other resources) and the aggressiveness of a jurisdiction's law enforcement agency are also key factors in understanding the nature and extent of crime occurring in that area. Although information pertaining to the number of sworn and civilian law enforcement employees can be found in this publication, it cannot be used alone as an assessment of the emphasis that a community places on enforcing the law. For example, one village may report more crime than a comparable one, not because there is more crime, but rather because its law enforcement agency through proactive efforts identifies more offenses. Attitudes of the citizens toward crime and their crime reporting practices, especially concerning minor offenses, also have an impact of the volume of crimes known to police.

Make valid assessments of crime

It is incumbent upon all data users to become as well educated as possible about how to understand and quantify the nature and extent of crime in Guam. Valid

assessments are possible only with careful study and analysis of the various unique conditions affecting local law enforcement jurisdiction. Some factors that are known to affect the volume and type of crime occurring from village to village are:

Population density and degree of urbanization.

Variations in composition of the population, particularly youth concentration.

Stability of population with respect to residents' mobility, commuting patterns, and transient factors.

Modes of transportation and highway system.

Economic conditions, including median income, poverty level, and job availability.

Cultural factors and educational, recreational, and religious characteristics.

Family conditions with respect to divorce and family cohesiveness.

Climate

Effective strength of law enforcement agencies.

Administrative and investigative emphases of law enforcement.

Policies of other components of the criminal justice system (i.e., prosecutorial, and probation).

Citizens' attitude toward crime.

Crime reporting practices of the citizenry.

SECTION I Summary of the Uniform Crime Report

--

Summary of the Uniform Crime Reporting (UCR) Program

The program's primary objective is to generate reliable information for use in the law enforcement administration, operation, and management; however, its data have over the years become one of the country's leading social indicators.

Purpose of the UCR

The Uniform Crime Reporting (UCR) Program is a nationwide, cooperative statistical effort of law enforcement agencies reporting data on crimes brought to their attention. The collection of reports is based on the fact that police need to compile certain basic data to generate reliable information for use in law enforcement administration, operation, and management; however, its data have over the years become the leading social indicators.

The public looks to the crime reports for information on fluctuations in the level of crime, and criminologists, sociologists, legislators, municipal planners, the media, and students of criminal justice use the statistics for varied research and planning purposes. The means utilized to attain these objectives are: to measure the total volume of serious crime known to police, to show the activity and coverage of law enforcement agencies through arrest counts and police employee strength data.

Law Enforcement Data Requirements

Local Law Enforcement executives need to know:

1. The number and kinds of criminal acts that occur.
2. The number of such crimes or offenses cleared.
3. The personal characteristics concerning persons arrested.
4. Law enforcement disposition of juvenile offenders.
5. Law enforcement employee information.

Data on the age, sex and race of persons arrested for all violations, except traffic offenses are included in this report. These tabulations come from basic records that show:

1. The extent of the patrol and crime prevention problem.
2. A measure of the results of investigative activity to solve crimes.
3. The characteristics and identities of known offenders.

Law enforcement is a public service, and citizens expect a full accounting from the police chief concerning the administration of the agency and the status of public safety within their jurisdiction.

Crimes were evaluated on the basis of their seriousness, frequency of occurrence, pervasiveness in all geographic areas and likelihood of being reported to law enforcement.

Seven main offense classifications, known as Part I crimes, were chosen to gauge the state of crime in the Nation, which includes Guam. These seven offense classifications included the violent crimes of murder and non-negligent manslaughter, forcible rape, robbery, aggravated assault, and the property crimes of burglary, larceny-theft, motor vehicle theft, and arson. These offenses are classified according to a Hierarchy Rule, with the exception of justifiable homicides, motor vehicle theft, and arson.

Offenses in Uniform Crime Reporting

The Uniform Crime Reporting (UCR) Program divides offenses into two groups, **Part I** and **Part II** crimes. The UCR Program collects data about **Part I** offenses in order to measure the level and scope of crime occurring throughout the Nation. **Part I** offenses are serious crimes, they occur with regularity in all areas of the country, and they are likely to be reported to police.

The **Part I** offenses are:

Criminal homicide-a.) Murder and nonnegligent manslaughter; the willful (nonnegligent) killing of one human being by another.

Forcible Rape - The carnal knowledge of a female forcibly and against her will. Rapes by force and attempts or assaults to rape, regardless of the age of the victim, are included. Statutory offenses (no force used-victim under age of consent) are excluded.

Robbery - The taking or attempted taking of anything of value from the care, custody, or control of a person or persons by force or threat of force or violence and/or by putting the victim in fear.

Aggravated Assault - An unlawful attack by one person upon another for the purpose of inflicting severe or aggravated bodily injury. This type of assault usually is accompanied by the use of a weapon or by means likely to produce death or great bodily harm. Simple assaults are excluded.

Burglary (breaking or entering) - The unlawful entry of a structure to commit a felony or a theft. Attempted forcible entry is included.

Larceny-theft (except motor vehicle theft) - The unlawful taking, carrying, leading, or riding away of property from the possession or constructive possession of another. Examples are thefts of bicycles or automobile accessories, shoplifting, pocket-picking, or the stealing of any property or article that is not taken by force and or violence or by fraud. Attempted larcenies are included. Embezzlement, confidence games, forgery, worthless checks, etc., are excluded.

Motor vehicle theft - The theft or attempted theft of a motor vehicle. A motor vehicle is self-propelled and runs on land surface and not on rails. Motorboats, construction equipment, airplanes, and farming equipment are specifically excluded from this category.

Arson - Any willful or malicious burning or attempt to burn, with or without intent to defraud, a dwelling house, public building, motor vehicle or aircraft, personal property of another, etc.

The **Part II** offenses, for which only arrest data are collected are:

Other assaults (simple) - Assaults and attempted assaults which are not of aggravated nature and do not result in serious injury to the victim.

Forgery and counterfeiting - The altering, copying, or imitating of something, without authority or right, with the intent to deceive or defraud by passing the copy or thing altered or imitated as that which is original or genuine, or the selling, buying, or possession of an altered, copied, or imitated thing with the intent to deceive or defraud. Attempts are included.

Fraud - The intentional perversion of the truth for the purpose of inducing another person or other entity in reliance upon it to part with something of value or to surrender a legal right. Fraudulent conversion and obtaining of money or property by false pretenses. Confidence games and bad checks, except forgeries and counterfeiting, are not included.

Embezzlement - The unlawful misappropriation or misapplication by an offender to his/her own use or purpose of money, property, or some other thing of value entrusted to his/her care, custody, or control..

Stolen property; buying, receiving, possessing - Buying, receiving, possessing, selling, concealing, or transporting any property with the knowledge that it has been unlawfully taken, as by burglary, embezzlement, fraud, larceny, robbery, etc. Attempts are included.

Vandalism - To willfully or maliciously destroy, injure, disfigure, or deface any public or private property, real or personal, without the consent of the owner or person having custody or control by cutting, tearing, breaking, marking, painting, drawing, covering with filth, or any other such means as may be specified by local law. Attempts are included.

Weapons; carrying, possessing, etc. - The violation of laws or ordinances prohibiting the manufacture, sale, purchase, transportation, possession, concealment, or use of firearms, cutting instruments, explosives, incendiary devices, or other deadly weapons. Attempts are included.

Prostitution and commercialized vice - The unlawful promotion of or participation in sexual activities for profit, including attempts.

Sex offenses (except forcible rape, prostitution and commercialized vice) - Statutory rape, offenses against chastity, common decency, morals, and the like. Attempts are included.

Drug abuse violations - The violation of laws prohibiting the production, distribution, and/or use of certain controlled substances. The unlawful cultivation, manufacture, distribution, sale, purchase, use, possession, transportation, or importation of any controlled drug or narcotic drugs. The following drug categories are specified; opium or cocaine and their derivatives (morphine, heroin, codeine); marijuana; synthetic narcotics - manufactured narcotics that can cause true addiction (demerol, methadone); and dangerous non-narcotic drugs (barbiturates, benzedrine).

Gambling - To unlawfully bet or wager money or something else of value; assist, promote, or operate game of chance for money or some other stake; possess or transmit wagering information; manufacture, sell, purchase, possess, or transport gambling equipment, devices, or goods; or tamper with the outcome of a sporting event or contest to gain a gambling advantage.

Offenses against the family and children - Unlawful nonviolent acts by a family member (or legal guardian) that threaten the physical, mental, or economic well-being or morals of another family member and that are not classifiable as other offenses, such as Assault or Sex Offenses. Attempts are included.

Driving under the influence - driving or operating a motor vehicle or common carrier while mentally or physically impaired as the result of consuming an alcoholic beverage or using a drug or narcotic.

Liquor laws - The violation of state or local laws or ordinances prohibiting the manufacture, sale, purchase, transportation, possession, or use of alcoholic beverages, not including driving under the influence and drunkenness. Federal violations are included.

Drunkenness - To drink alcoholic beverages to the extent that one's mental faculties and physical coordination are substantially impaired. Excludes driving under the influence.

Disorderly conduct - Any behavior that tends to disturb the public peace or decorum, scandalize the community, or shock the public sense of morality.

Vagrancy - The violation of a court order, regulation, ordinance, or law requiring the withdrawal of persons from the streets or other specified areas; prohibiting persons from remaining in an area or place in an idle or aimless manner; or prohibiting persons from going from place to place without visible means of support.

All other offenses - All violations of state or local laws not specifically identified as Part I or Part II offenses, except traffic violations.

Suspicion - Arrested for no specific offense and released without formal charges being placed.

Curfew and loitering laws (persons under age 18) - Violations by juveniles of local curfew or loitering ordinances.

Runaways (persons under age 18) - Limited to juveniles taken into protective custody under the provisions of local statutes.

CALCULATION OF RATES

The Uniform Crime Reporting Program provides data for police executives to measure local problems. To facilitate this function, the local data must be converted into terms of rates and percentages. Simple formulas are presented which may assist in this computations.

Offenses and Arrest Rates

One of the most meaningful crime statistics is the crime rate. Crime rates are indicators of reported crime activity standardized by population. They are more refined indicators for comparative purposes than are volume figures. An offense rate, defined as the number of offenses per 1,000 population, is derived by first dividing a jurisdiction's population by 1,000 and then dividing the number of offenses by the resulting figure.

Example:

- a. Population for Guam, 155,000
- b. Number of known burglaries for 2005, 1,126.

Divide 155,000 by 1,000 = 155
Divide 1,126 by 155 = 7.3

The burglary rate is 7.3 per 1,000 inhabitants.

Clearance Rates

The percentage of crimes cleared by arrest is obtained first by dividing the number of offenses cleared by the number of offenses known and then multiplying the resulting figure by 100.

Example:

- a. Number of clearances in robbery, 29
- b. Number of total robberies, 60

Divide 29 by 60 = .48
Multiply .48 by 100 = 48

The clearance rate for robbery is 48 percent.

Crime Trends

A crime trend represents the percentage change in crime based on data reported in a prior equivalent period.

Example:

- a. Rape for January through December, last year, 172.
- b. Rape for January through December, this year, 219.

Subtract:
172 (2004)
-219 (2005)
47

Divide 47 by 172 = .27

Multiply .27 by 100 = 27 percent.

The volume trend for Rape is an increase of 27 percent.

Police Employees Rates

Police employees rates are expressed as the number of employees per 1,000 inhabitants. To compute such a rate, divide the island's population by 1,000 and divide the number of employees by this number.

Example:

- a. Population, 155,000
- b. The number of officers, 255

Divide 155,000 by 1,000 = 155

Divide 255 by 155 = 1.6

The employee rate is 1.6 officers per 1,000 inhabitants.

SECTION II Offenses Reported

Violent Crimes

Definition

Violent crime is composed of four offenses: murder and non-negligent manslaughter, forcible rape, robbery, and aggravated assault. According to the Uniform Crime Reporting (UCR) Program's definition, violent crimes involve force or threat of force.

In 2005, there were an estimated 388 violent crimes reported to police. Of these, aggravated assaults comprised of 32.2 percent; robbery, 27 percent; rape, 39 percent; and murder 1.8 percent.

Crime data are in increments of 2, 5, and 10 years to formulate trend information. From 2004 to 2005, the estimated volume of violent crime decreased 10.2 percent. The 5- and 10- year trend data showed an estimated number of violent crimes increased 2.7 percent compared to 2001 figure and decreased 25.5 percent compared to 1996 data.

Violent Crimes, 2001 - 2005

Murder

Definition

The Uniform Crime Reporting (UCR) Program defines murder and non-negligent manslaughter as the willful (non-negligent) killing of one human being by another.

The classification of this offense is based solely on police investigation as opposed to the determination of a court, medical examiner, coroner, jury, or other judicial body. The UCR Program does not include the following situations in this offense classification: deaths caused by negligence, suicide, or accident; justifiable homicides; and attempts to murder or assaults to murder, which are scored as aggravated assaults.

Trend

<i>Year</i>	<i>Number of offenses</i>	<i>Rate per 1,000 inhabitants</i>
2004	9	.05
2005	7	.04
Percent change	-22.2	-20.0

The number of murders reported to police in 2005 decreased 22.2 percent when compared to 2004. An analysis of 5- and 10-year trend data showed a decline of 13.0 percent from 2001 and 53.3 percent decline from 1996. The lowest number of murder reported by Guam police in ten years was in 2002 with only one homicide, and one negligent manslaughter.

Island wide, the murder rate in 2005 showed .04 percent murders per 1,000 inhabitants, .05 percent in 2001 and the highest was in 1996 with .09 percent.

Homicide data in 2005 (where the age, sex, or race of murder victims were known) 85.7 percent of the murder victims were adults and 14.3 percent was a minor. Of the total number of homicide victims 71.4 percent were male and 28.6 percent were females. Where the races of victims were known, 42.9 percent were Chuukese and 14.3 percent each for Guamanian, Palauan, Korean and Vietnamese.

The data for 2005 concerning the murders for which the offenders were known showed that all the offenders were adults. A breakdown of the data by gender showed that 81.8 percent were male, 9.1 percent was a female. One homicide case remained unsolved with offender still unknown.

Of those incidents in which the murder weapon was specified, 16.7 percent of the homicides that occurred in 2005 was with firearm, another one was personal weapon (strong arm) and 33.3 percent each for knife or cutting instrument and blunt objects.

Of the homicides for which law enforcement provided data, the victim-offender relationship was unknown for 14.3 percent of the victims. For the incidents in which the relationships were known, 85.7 percent of the victims knew their killers. Among the incidents in which the victims knew their killers 71.4 percent were acquaintances.

Homicide data showed that the circumstances were known for 83.3 percent of the murders that occurred in 2005. For the murders for which the circumstances were known, 16.7 percent involved robbery. Law enforcement cited brawls due to the influence of alcohol were the cause of 33.3 percent of the murders

Forcible Rape

Definition

Forcible rape, as defined in the Uniform Crime Reporting (UCR) Program, is the carnal knowledge of a female forcibly and against her will. Assaults and attempts to commit rape by force or threat of force are also included; however, statutory rape (without force) and other sex offenses are excluded.

The UCR program counts one offense for each female victim of a forcible rape, attempted forcible rape, or assault with intent to rape, regardless of the victim's age. The Program classifies as Part II offenses all other crimes of sexual nature and, as such, collects only arrest statistics concerning them. Statutory rape, in which no force is used but the female victim is under the age of consent, is included in the aggregated arrest total for the sex offenses category. Sexual attacks on males are counted as aggravated assaults or sex offenses, depending on the circumstances and the extent of any injuries.

Rapes reported in 2005 was the lowest in the last five years with 151. This figure represents a decrease of 6.2 percent when compared to 2004 and also a decrease of 9 percent from the 2001 figure. The highest number of rapes reported to police was in 2003 with 219.

In 2005, approximately 173 females were victims of non-forcible rape, 25 percent were victims of forcible rape and 75 percent were attempted forcible rape or assault with intent to rape. 25.6 percent were victims under the age of 18 and 74.4 percent were 18 years and above. There were 130 non-forcible rapes reported with 88.5 percent victims under 18 years of age and 11.5 percent were victims over 18 years old.

2005 Rape by Type

Forcible Rape: 28.5%

Non-forcible Rape: 71.5%

2005 Rape

Robbery

Definition

The Uniform Crime Reporting (UCR) Program defines robbery as the taking or attempting to take anything of value from the care, custody, or control of a person or persons by force or threat of force or violence and/or by putting the victim in fear.

The number of robberies increased this year by 1.0 percent when compared to 2004 and the highest within the five year period. Robberies increased 47.9 percent in 2005 when compared to 2001. Among location types, robberies from convenience stores were highest with 14.3 percent when compared to other categories this year.

2005 supplemental data regarding the type of weapons offenders used in the commission of the robbery showed that the assailants relied on strongarm tactics in 64 percent of robberies during 2005; they employed firearms in 18.01 percent of robberies. Offenders used knives or other cutting instruments in 13.3 percent of these crimes. From 2001 to 2005 strongarm was the highest weapons used when compared to other weapons used by offenders.

Robberies by villages showed Tamuning and Tumon reported the same figure in 2005 with 15.2 percent for both villages. Dededo was second highest with 9.5 percent .

Guam Police data on arrests reports on the number of persons arrested, not the number of charges lodged against those persons. For example, when a person is arrested for several crimes that occurred at the same time, only one arrest is counted. Also, if a person is arrested several times during the year for violations that happened during separate and distinct instances, we count each arrest separately.

The number of arrests for robbery in 2005 were up in the 2 - and 5-year trends. A comparison of the 2004 and 2005 total number of arrests increased 72.4 percent over the 2-year period. In the 5-year trend (2001-2005), the number of arrests for robbery increased 127.3 percent.

2005 arrest data also showed that 40 percent of those arrested for robbery were under the age of 25. A review of the gender showed that males accounted for 90 percent of the arrestees for robbery. By race, 68 percent were Chamorros, 12 percent were Chuukese and the remaining 20 percent were of other races.

Aggravated Assault

Definition

The Uniform Crime Reporting (UCR) Program defines aggravated assault as an unlawful attack by one person upon another for the purpose of inflicting severe or aggravated bodily injury. The Program further specifies that this type of assault is usually accompanied by the use of a weapon or by other means likely to produce death or great bodily harm. Attempted aggravated assault that involves the display of – or threat to use — a gun, knife, or other weapon is included in this crime category because serious personal injury would likely result if the assault were completed. When aggravated assault and larceny-theft occur together, the offense falls under the category of robbery.

The number of aggravated assaults has declined. In 2005, occurrences of this offense decreased 20.9 percent compared with 2004 number, down to 125 offenses. When compared with 2001 with 133 aggravated assaults reported to police, 2005 still showed decline of 6.0 percent. 2005 reported aggravated assaults declined when compared to 2003 with the highest within the past five years with 162 in numbers, a 22.8 percent decrease.

Collection of data on the type of weapons used in aggravated assault showed that in 2005, knife or other cutting instruments were used in 28.8 percent of the offenses; personal weapons (i.e., hands, fists, feet, etc.,) were 27.2 percent; and blunt objects, 20.0 percent. Weapons in the category of “other” were used in the remaining 24 percent of this offense.

Victims in 2005 reported aggravated assaults were mostly males; 67.2 percent. The female victims accounted for 32.8 percent.

Victims by race were Chamorros making 46.4 percent, Chuukese, 20 percent and Filipino victims reported 13.6 percent.

The UCR program collects data based on the number of persons arrested not the number of offenses committed during a single incident.

From 2004 to 2005, the number of arrests for aggravated assault declined 46.3 percent. Compared with the two-year trend, five-year trend data showed steeper declines. The number of arrests for aggravated assault decreased 64.7 percent in 2005 compared with the 2001 data.

The number of male arrestees made up 90.2 percent and the females accounted for 9.8 percent of those arrested for aggravated assaults in 2005. By race, 40.2 percent were Chamorros, Chuukese, 29.4 percent and 12.8 percent were Filipinos.

PROPERTY CRIME

Definition

In the Uniform Crime Reporting (UCR) Program, property crime includes the offenses of burglary, larceny-theft, motor vehicle theft and arson. The object of the theft-type offenses is the taking of money or property, but there is no force or threat of force against the victims. The property crime category includes arson because the offense involves the destruction of property; however, arson victims may be subjected to force. Because the limited participation and varying collection procedures by local agencies, only limited data are available for arson.

Police reported 4,651 property crimes were committed in Guam in 2005, representing a .5 percent decrease from 2004, 1.1 percent increase compared with 2001 and 37.2 percent decrease from the 1996 estimate.

In 2005, each of the individual property crimes showed increase from 2004 except for larceny-thefts. The number of burglaries was up 13.6 percent, the number of motor vehicle thefts was up 1.3 percent and larceny-thefts was down 6.6 percent.

The estimated property crime rate per 1,000 inhabitants in 2005 declined 1.0 percent when compared with 2004 rate.

Burglary

Definition

Burglary is defined in the Uniform Crime Reporting (UCR) Program as the unlawful entry of a structure to commit a felony or theft. The use of force to gain entry is not required to classify an offense as burglary. Burglary in the UCR program is categorized into three subclassifications; forcible entry, unlawful entry where no force is used, and attempted forcible entry.

In 2005, 1,468 burglary offenses were reported to police. This figure is an increase of 13.6 percent when compared with 2004 and also of 47.4 percent increase compared with the 2001 data.

As in the past, burglars targeted homes more often than nonresidential structures. An analysis of data showed 70.6 percent of burglaries were residential, and 29.4 percent were of nonresidential structures. Using the highest three villages, data reflected burglary offenses by village with 22.5 percent for Dededo, Tamuning with 11.6 percent and Yigo 7.6 percent.

Data information provided to police does not give the exact time when these burglaries occurred. However, in 2005, of the burglaries for which time could be established, 44.6 percent residential burglaries occurred during the day, from 6 a.m. to 6 p.m. and 26 percent occurred at night. Residential burglaries in Dededo village was highest with 25.4 percent, Tamuning, with 8.9 percent and Yigo village accounted the third highest with 8.4 percent. Residential burglaries at night also showed Dededo with 27.7 percent, Yigo with 9.7 percent and Mangilao with 9.0 percent. Burglaries of nonresidential structures was highest in Tamuning with 19 percent, and Harmon with 13 percent.

Daytime burglaries, 6 a.m. to 6 p.m., for nonresidential structures were estimated at 23.4 percent and those occurring at night, 6 p.m. to 6 a.m., showed 6.1 percent.

Clearances involving juveniles accounted for 42.5 percent of the total of burglary clearances in 2005, reflecting an increase of 54.5 percent when compared with 2004 juvenile offenders. The 14 - 15 years age group made up 51 percent with 49 percent for the other ages under 18. Juvenile offenders in 2005 increased 54.5 percent when compared with 2004.

The number of arrests for burglary in 2005 was slightly less than the number in 2004. In this 2-year period, the number of adults arrested for burglary decreased 2.8 percent. The 25-29 year age group was 24.6 percent of adults arrested.

Larceny-theft

Definition

The Uniform Crime Reporting (UCR) Program defines larceny-theft as the unlawful taking, carrying, leading, or riding away of property from the possession or constructive possession of another; attempts to do these acts are included in the definition. This crime category includes shoplifting, pocket-picking, purse-snatching, thefts from motor vehicles, thefts of motor vehicle parts and accessories, bicycle thefts, and so forth, in which no use of force, violence, or fraud occurs. Excluded from larceny-theft is motor vehicle theft, which is classified in a separate offense category, also excluded are crimes that involve embezzlement, confidence games, forgery, and worthless checks---- all of which are UCR Part II offenses.

In 2005, larceny-theft accounted for 61.3 percent of property crimes. Trend data showed that the number of larceny-thefts decreased 6.6 percent from 2004, 14.4 percent decrease from 2001, and 37 percent from 1996.

Two-, five, and ten-year trend data also showed a decline in the frequency of larceny-theft per 1,000 inhabitants. In 2005, police reported 2,851 occurrences of this offense. There were 16.9 percent larceny-thefts per 1,000 inhabitants. The trend in rates reflect declines of 18.4 percent in 2004, 21.1 percent in 2001, and 29.2 percent in 1996.

Larceny-thefts accounted for 61.3 percent of property crimes in 2005. Thefts from buildings accounted for the majority of the offense, 35.2 percent, "all others", a category that includes the less-defined larceny-theft offenses, accounted for 27.6 percent of the total.

The number of arrests for larceny-theft offenses decreased 27.6 percent in 2005 compared with 2004 data. For the same period,

arrests of juveniles in this crime category increased 28.9 percent while arrests of adults declined 39 percent. In contrast to the 2-year trend, 5- and 10-year trend data showed arrests for larceny-theft offenses, a decrease of 54.4 percent compared with 2001 data and 50.5 percent with 1996 data.

The majority of arrestees for larceny-theft offenses in 2005 were under 25 years of age. Offenders under 25 accounted for 29.1 percent of the arrestees, those under 18 years old accounted for 29.7 percent. Across all age groups collectively, 67 percent of those arrested for larceny-theft were locals (Chamorros), and 11 percent each for Filipinos, Chuukese, and other races.

More males than females, 74.5 percent, were arrested for larceny-theft in 2005. Females accounted for 25.5 percent of the arrestees. An analysis of arrests for all property crime categories shows that females were arrested more often for larceny-theft offenses than for other crimes. Of all females arrested for larceny-theft, 6.1 percent were under age 18.

Motor Vehicle Theft

Definition

The Uniform Crime Reporting (UCR) Program defines motor vehicle theft as the theft or attempted theft of a motor vehicle. The offense includes the stealing of automobiles, trucks, buses, motorcycles, etc. The taking of a motor vehicle for temporary use by persons having lawful access is excluded from this definition

In 2005, there were an estimated 315 motor vehicle thefts in Guam. The number of motor vehicles estimated to have been stolen in 2005 decreased 1.3 percent from 2004 estimate, increased 23.5 percent from 2001 estimate and decreased 57.7 percent from the 1996 estimate.

Pick-up trucks were the most frequently stolen vehicle type, accounting for 44.8 percent of all vehicles stolen. Automobiles accounted for 42.2 percent and other vehicles accounted for 13 percent. By type of vehicle, pick-up trucks were stolen at a rate of .83 percent trucks per 1,000 in population in 2005. Automobiles were stolen at a rate of .79 percent cars per 1,000 in population, and other types of vehicles were stolen at a rate of .24 percent vehicles per 1,000 people.

The most populous village of Dededo experienced the highest motor vehicle thefts, with 26.7 percent, Tamuning accounted for 20.3 percent and Tumon accounted for 9.8 percent.

Two, five-, and ten- year trends of arrests for motor vehicle thefts showed some interesting changes. The 2-year trend indicated a 19.4 percent decrease in the number of arrests made. However, the five-year trend showed

the number of arrests rose 4.2 percent from the 2001 level. The 10-year trend showed a 76.4 percent drop in motor vehicle theft arrests in 2005 when compared with the 1996 arrest data.

Arson

Definition

The Uniform Crime Reporting (UCR) Program defines arson as any willful or malicious burning or attempting to burn, with or without intent to defraud, a dwelling house, public building, motor vehicle or aircraft, personal property of another, etc.

According to the UCR Program's guidelines, only fires that law enforcement investigation determined to have been willfully or maliciously set may be classified as arson, fires of suspicious or unknown origin are not reported.

The number of arsons reported in 2005 increased 6.3 percent when compared with 2004 data, decreased 15 percent compared with 2001, and increased 30.7 percent compared to 1996. The number of arsons decreased for both structural and mobile property types in 2005. Arsons of structural property decreased 45.5 percent and arsons for the mobile type declined 20 percent.

In 2005, arsons of structures accounted for 35.3 percent of all arsons. Mobile arsons accounted for 23.5 percent. Within this category 100 percent of the offenses involved the burning of motor vehicles. Other types of property comprised of 41.2 percent of reported arson offenses.

The volume of arrests for arson was only four in 2005, or 300 percent when compared with 2004 and increased of 33.3 percent compared with 1996.

Arson

Trend, 2001 -2005

Arson

Arrests, 2001 - 2005

SECTION III **Selected Non-Index Crimes**

Drug Abuse Violations

The violation of laws prohibiting the production, distribution, and/or use of certain controlled substances. The unlawful cultivation, manufacture, distribution, sale, purchase, use, possession, transportation, or importation of any controlled drug or narcotic substance. Arrests for violations of state and local laws, specifically those relating to the unlawful possession, sale, use, growing, manufacturing, and making of narcotic drugs. The following drug categories are specified; opium or cocaine and their derivatives (morphine, heroin, codeine); marijuana; synthetic narcotics—manufactured narcotics that can cause true addiction (demerol, methadone); and dangerous nonnarcotic drugs (barbiturates, benzedrine).

Arrests

By Drug Type, 2001 - 2005

Arrests

By Drug Violations, 2001 - 2005

Schedule I: Marijuana/LSD/Methaqualone

Schedule II: Methamphetamine/Cocaine/PCP

Other: Schedule III: Codeine/Anabolic/Steroids/Barbiturates

Schedule IV: Darvon/Valium/Talwin/Equanil

Schedule V: Over-the counter cough medicines w/codeine

SECTION VI **Offenses involving Juveniles**

Police Disposition of Juveniles (Not Including Neglect or Traffic Cases)

The UCR Program considers a *juvenile* to be an individual under 18 years of age regardless of state definition. *Juveniles* taken into custody by authorized police officers are only for violations where some police or official action is taken beyond a mere interview, warning, or admonishment. For example, children playing ball in the street who are instructed by an officer to go to the playground for such activity would not be counted as arrested any more than would an adult who is only warned against burning leaves on a windy day. *Juvenile* statistics are being gathered to measure criminal activity, not *juvenile* court activity.

Depending on the seriousness of the offense and the offender's prior criminal record, a *juvenile* may be warned by the police and released to parents, relatives, friends, or guardians. *Juveniles* may also be referred to the probation department or some other branch of the *juvenile* court, to welfare agencies, to other law enforcement agencies, or in the case of serious offenders, to criminal or adult court by waiver of the *juvenile* court.

Police Dispositions of *Juveniles* are:

1. Handled within the Department and released.

Police take many *juveniles* into custody or arrest them for committing a violation but make no referral to *juvenile* court and do not file formal charges. In most cases, the *juvenile* is warned by the police and released, frequently to parents, guardians, relatives, or friends.

2. Referred to criminal or adult court.

Police release the *juvenile* to the custody of the parent/guardian with the guarantee that the *juvenile* will appear at the Superior Court of Guam for a Preliminary Hearing.

3. Referred to welfare agency.

Police refer the youth to a welfare agency, either public or private, rather than to *juvenile* court or the probation department. *Juveniles* taken into custody are brought to the Department of Youth Affairs by authorized police officers to be detained.

Clearances Involving only Persons Under 18 Years of Age

When an offender under the age of 18 is cited to appear in *juvenile* court or before other *juvenile* authorities, the UCR Program considers the incident for which the *juvenile* is being held responsible to be cleared by arrest, although a physical arrest may not have occurred. In addition, according to Program definitions, clearances that include both adult and *juvenile* offenders are classified as clearances for crimes committed by adults. Therefore, because the clearance percentage for crimes committed by *juveniles* include only those clearances in which no adults were involved, the figures in this publication should not be used to present a definitive picture of *juvenile* involvement in crime.

SECTION VII Law Enforcement Personnel

Law Enforcement Personnel

Because of the differing service requirements and functions, care should be taken when using the data presented in this section to draw comparisons between and among the staffing levels of the Guam Police Department. What follows is not intended as recommended or preferred officer strength; the data should be viewed merely as guides.

This section of Crime in Guam (2004 Uniform Crime Report) presents data as the number and rate of sworn Law Enforcement Officers with the Guam Police Department. The data are broken down by precincts and population. We compute the rate of sworn law enforcement employees by taking the number of employees (sworn officers only) dividing by the population for each precinct in which police provide law enforcement service, and multiplying by 1,000.

The demographic traits and characteristics of a jurisdiction affect its requirements for law enforcement service. For instance, a business community like the villages of Tamuning, Tumon and Harmon require more law enforcement presence than a community of the same size that has no urban center nearby. A community with legal gambling (game rooms) may have different law enforcement needs than one near a military base. The needs of a community, like the village of Dededo, with a highly mobile or seasonal population may be very different from a village, like Mangilao, whose population is relatively stable.

Similarly, the functions of law enforcement agencies are significantly diverse. They patrol local streets and highways, they protect citizens in Guam's smallest villages and largest communities, they conduct investigations on offenses around the block or around the island. Patrol officers in one area may enforce traffic laws on highways; in another area, they may be responsible for investigating violent crimes. These and other duties have an impact on police staffing levels.

Because of the differing service requirements and functions, care should be taken when using the data presented in this section to draw comparisons between and among the staffing levels of law enforcement agencies. What follows is not intended as recommended or preferred officer strength; the data should be viewed merely as guides. Adequate staffing levels can be determined only after careful study of the conditions that affect the service requirements in a particular jurisdiction.
