Guam Police Department
Planning, Research and Development

Forward, *Crime in Guam, 2015*

The Uniform Crime Reporting (UCR) Program was established by law enforcement in order to meet the need for crime statistics used in operational planning and policymaking. The purpose of the UCR Program is to collect accurate and pertinent crime data for the daily use of law enforcement. Narratives, graphics, and tabular portions highlight trends identified in the reported figures for the year.

In addition to our law enforcement agency, the vast compilation of data serves a large and varied audience. The Program's data users who formulate policies, make strategic and operational decision, and conduct criminological research and analysis include members of the criminal justice community, governmental agencies, legislators, researchers, students, the media, corporate managers, and the general public. The Program's data are essential for those seeking to understand the nature and extent of crime in Guam.

The Uniform Crime Reporting (UCR) Program serves as a long standing example of how the island can benefit when information flows freely among local police commands. The cooperative efforts to provide their jurisdictions' crime reports enable Guam Police Department (GPD) to present island view on crime.

In 2000, GPD took an advance step in developing a Records Management System that will provide the information needed to generate UCR data. The Guam Police Department's goal is to provide a reliable set of crime statistics for use in law enforcement administration, operations, and management.

In addition to meeting national UCR Program standards, definitions, and information required, the Guam Police Department also provides statistical data beyond the national collection standards. The collection of additional data for submission in the national program may provide the Guam Police Department with funds to underwrite projects designed to reduce crime and improve public safety. To support local legislation, GPD also provides local lawmakers a trustworthy set of statistics which empower them to design a criminal justice system that is capable of responding to current crime trends.

The resulting valuable data source is used in a multitude of applications. Information sharing has become a priority as law enforcement works together to enhance criminal justice information network, to investigate crimes and to prevent terrorist acts. The UCR Program continues to be a resource for crime in Guam and it is our hope that the 2015 Crime in Guam issue will help law enforcement leaders make the best possible decisions to secure safety and prosperity in our communities.

Joseph I. Cruz
Chief of Police

Crime Factors

Caution Against Ranking/Categorizing

Each year when Crime in Guam is published, the Guam Police Department places caution in the ranking or categorizing levels of crime specific to the villages in the jurisdiction. The use of reported figures to determine how villages "rank" amongst each other, without the consideration of other demographics or variables beyond the scope of this publication, provides a risk of error or omission. Consequently, "ranking" may lead to incomplete analysis that often creates misleading perceptions that can adversely affect village residents and businesses.

Characteristics of a Jurisdiction

To assess criminality and law enforcement's response from jurisdiction to jurisdiction, one must consider many variables, some of which, while having significant impact on crime, are not readily measureable or applicable pervasively among all locales. Geographic and demographic factors specific to each jurisdiction must be considered and applied if one is going to make an accurate and complete assessment of crime in that jurisdiction. Several sources of information are available that may assist the responsible researcher in exploring the many variables that affect crime in a particular locale. The U.S. Census Bureau data, for example, can be used to better understand the makeup of a locales' population. The transience of the population, its racial and ethnic makeup, its composition by age and gender, educational levels, and prevalent family structure are all key factors in assessing and comprehending the crime issue. The local chamber of commerce, planning offices, or similar entities provide information regarding the economic and cultural makeup of communities/villages here in Guam. Understanding a jurisdiction's industrial/economic base; its dependence upon neighboring jurisdictions; its transportation system; its economic dependence on nonresidents (such as tourists and off island business visitors); its proximity to military installations, correctional facilities, etc., all contribute to accurately gauging and interpreting the crime known by law enforcement.

The strength (personnel and other resources) and the aggressiveness of a jurisdiction's law enforcement agency are also key factors in understanding the nature and extent of crime occurring in that area. Although the information pertaining to the number of sworn law enforcement employees can be found in this publication. It cannot be used alone as an assessment of the emphasis that a community places on enforcing the law. For example, one village may report more crime than a comparable one, not because there is more crime, but rather because its law enforcement agency through proactive efforts identifies more offenses. Attitudes of the citizens toward crime and their crime reporting practices, especially concerning minor offenses, also have an impact of the volume of crimes known to police.

Some factors that are known to affect the volume and type of crime occurring from place to place are:

- Population density and degree of urbanization.
- Variations in composition of the population, particularly youth concentration.
- Stability of population with respect to resident's mobility, commuting patterns, and transient factors.
- Modes of transportation and highway system.
- Economic conditions, including median income, poverty level, and job availability.
- Cultural factors and educational, recreational, and religious characteristics.
- Family conditions with respect to divorce and family cohesiveness.
- Climate.
- Effective strength of law enforcement .
- Administrative and investigative emphases of law enforcement.
- Policies of other components of the criminal justice system (i.e., prosecutorial, judicial, correctional, and probation).
- Citizens' attitudes toward crime.
- Crime reporting practices of citizenry.

SECTION I-

Summary of the Uniform Crime Report

Summary of the Uniform Crime Reporting (UCR) Program

Eight main offense classifications, known as Part I Crimes, were chosen to measure fluctuations in the overall volume and rate of crime in the nation, which includes Guam. These eight offense classifications include the violent crimes of; murder and non-negligent manslaughter, forcible rape, robbery, aggravated assault, and the property crimes of: burglary, larceny- theft, motor vehicle theft, and arson. These offenses are classified according to Hierarchy Rule, with the exception of justifiable homicides, motor vehicle theft, and arson. In the UCR Program, justifiable homicide is defined as and limited to;

- 1). The killing of a felon by a peace officer in the line of duty.
- 2). The killing of a felon, during the commission of a felony, by a private citizen.

Hierarchy Rule

The experience of law enforcement agencies in handling UCR data shows that, for the most part, offenses of law occur singly as opposed to many being committed simultaneously. In these single-offense situations, law enforcement agencies must decide whether the crime is a Part I Offense. If so, the agency must score the crime accordingly. However, several offenses are committed at the same time and place by a person or a group of persons, a different approach must be used in classifying and scoring. The law enforcement matter in which many crimes are committed simultaneously is called a multiple offense situation. As a general rule, a multiple offense situation requires classifying each of the offenses occurring and determining which of them are Part I crimes. The Hierarchy rule requires that when more than one Part I is classified, the law enforcement agency must locate the offense that is highest on the hierarchy list and score that offense involved and not the other offense(s) in the multiple-offense situation.

The Hierarchy Rule applies only to crime reporting and does not affect the number of charges for which the defendant may be prosecuted in the courts. The offenses of justifiable homicide, motor vehicle theft and arson are exceptions to the Hierarchy Rule.

Separation of Time and Place Rule

Occasionally, an individual or a group will perpetrate a number of offenses over a short period of time. If there is a separation of time and place between the commission of several crimes, the reporting agency must handle each crime as a separate incident and must classify and score each offense individually.

"Same time and place" means that the time interval between the offenses and the distance between locations where they occurred are insignificant. Normally, the offenses must have occurred during an unbroken time duration and at the same or adjoining locations. However, incidents can also be comprised of offenses which by their nature, involve continuing activity to constitute a single criminal transaction.

"Because it is not possible to provide instructions that will cover all of the situations that might occur, in some cases the reporting agency will have to use its best judgment in determining how many incidents were involved".

Summary of the Uniform Crime Reporting (UCR) Program

Seven main offense classifications, known as Part I Crimes, were chosen to gauge the overall fluctuations in the overall volume and rate of crime. These seven offense classifications included the violent crimes of murder and non-negligent manslaughter, forcible rape, robbery, aggravated assault, and the property crimes of burglary, larceny-theft, motor vehicle theft and arson. These offenses are classified according to Hierarchy Rule, with the exception of justifiable homicides, motor vehicle theft, and arson.

The reporting of offenses known is limited to the crime classifications mentioned because they are the most serious and commonly reported crimes occurring in all areas of the United States. Together they serve as a gauge of the level and scope of crimes occurring across the United States and Guam. For each incident known to police within these categories, law enforcement collects administrative, offense, victim, property, offender, and arrestee information.

The collection of crime reports is based on local, state, national and public need to understand the nature of crime within law enforcement jurisdictions. Complete crime statistics assist people concerned with administrative, operational, and policy developments affected by crime.

Specifically, identified needs include:

1. The number and kinds of criminal acts that occur (offenses known).
2. The number of such crimes or offenses cleared.
3. The personal characteristics concerning persons arrested.
4. Law enforcement disposition of juveniles.
5. Law enforcement employee information.
6. The characteristics of known offenders.

Law enforcement officials, researchers, and policy makers equipped with this information can present a clear picture of crime situation within jurisdictions and gain an understanding of steps needed to effectively address crime.

Classifying and scoring offenses are two core functions for reporting crime in the UCR Program. Classifying is determining the proper crime categories in which to report offenses in the UCR. The offense's classification is based on the facts of an agency's investigation of crimes.

Scoring is counting the number of offenses after they have been classified. The appropriate scoring of Part I crimes is directly related to the two types of crimes involved, crimes against the person and crimes against the property.

Law Enforcement Agency (LEA) participants classify and score offenses from records of calls for service, complaints, and/or investigations. Since these crime statistics are intended to assist law enforcement in identifying the crime problem, participants record offense counts, not the findings of a court, coroner, or jury or the decision of a prosecutor.

Section II - Offenses Reported

Violent Crime

Definition

Violent crime is composed of four offenses; murder and nonnegligent manslaughter, forcible rape, robbery, and aggravated assault. Violent crimes involve force or threat of force.

Volumes, Trends, and Rates

In 2015, there were 692 violent crimes reported islandwide. Of these, aggravated assault comprised of 58.0 percent; robbery 18.0 percent; forcible rape was 23.1 percent; and murder accounted for 1.1 percent.

The UCR Program examines data in increments of 2, 5, and 10 years to formulate trend information. Violent crimes in 2015 increased 26.1 percent compared to 2014 and 25.2 percent compared to 2011 and 68.3 percent compared to 2011 data.

The occurrence of violent crime throughout the island in 2015 was estimated at a rate of 4.3 percent violent offenses per 1,000 inhabitants. The volume of individual offenses within the violent crime category showed that in a year-to-year comparison of 2014 and 2015 data, the number of aggravated assault increased 36.0 percent, robberies decreased 3.2 percent, and murder increased 14.3 percent. Forcible rape increased 35.6 percent when compared to 2014.

Offense Trends and Rates

In terms of the rate of offenses for each of the four violent crimes, aggravated assault reflected the highest rate at 2.5 percent offenses per 1,000 inhabitants. There were about 1.0 percent (0.7) robberies, 0.76 percent were forcible rapes, and 0.05 percent for murders for each 1,000 resident population in 2015.

For UCR reporting, Guam is grouped into two districts: District I, Dededo Precinct Command and Tamuning-Tumon Precinct Command, District II - Hagatna Precinct Command and Agat Precinct Command. The population distribution of the districts, by village is provided on page 76.

A look at the volume of violent crimes in 2015, by village showed that an estimated 3.0 percent of violent crimes occurred in the village of Dededo. The violent crime rates were estimated at about 3.4 percent violent offenses per 1,000 inhabitants.

Murder

Definition

The Uniform Crime Reporting (UCR) Program defines murder and nonnegligent manslaughter as the willful (nonnegligent) killing of one human being by another.

The classification of this offense is based solely on police investigation as opposed to the determination of a court, medical examiner, coroner, jury, or other judicial body. The UCR Program does not include the following situations in this offense classification: deaths caused by negligence, suicide, or accident; justifiable homicides and attempts to murder or assaults to murder, are classified as aggravated assaults.

Volume, Trends, and Rates

The UCR Program's 2015 homicide data showed the number of murders in Guam slightly increased 75.0 percent when compared to 2011. There were 8 homicide cases reported in 2015 with 8 victims.

An analysis of 5 years trend data showed the number of murders remained low with the lowest at 3 reported homicides in 2012 and **2013**, in 2011, 6 reported, 2013 and 2015 were the highest within the 5-year trend with 8 reported homicides. In 2015, three homicides were reported in February, two homicides cases were reported for the month of April, and 1 each in June, July and October a total of 8 reported homicides.

The 2015 data yielded a rate of 0.05 murders per 1,000 inhabitants. All five years reflected very low numbers reported with 3 murders and the highest with 8 in 2013 and 2015.

This section of violent crimes provide more information regarding the age, sex, and race of the murdered victims and the offenders. The type of weapon used in the offense, the relationship of the victims to the offenders, and the circumstances surrounding the cases, are also included within this section.

Forcible Rape

Definition

Forcible rape, as defined in the Uniform Crime Reporting (UCR) Program, is the carnal knowledge of a female forcibly and against her will. Assaults or attempts to commit rape by force or threat of force are also included; however, statutory rape (without force) and other sex offenses are excluded.

Offense Methodology

The UCR Program counts one offense for each female victim of a forcible rape, attempted forcible rape, or assault with intent to rape, regardless of victim's age. The Program classifies as Part II offenses all other crimes of a sexual nature and, as such, collects only arrest statistics concerning them. Statutory rape, in which no force is used but the female victim is under the age of consent, is included in the aggregated arrest total for the sex offenses category. Sexual assaults on males are counted as aggravated assaults or sex offenses, depending on the circumstances and the extent of any injuries.

Robbery

Definition

The Uniform Crime Reporting (UCR) Program defines robbery as the taking or attempting to take anything of value from the care, custody, or control of a person or persons by force or threat of force or violence and/or by putting the victim in fear.

Robbery is a vicious type of theft in that it is committed in the presence of the victim. The victim, who usually is the owner or person having custody of the property, is directly confronted by the perpetrator and is threatened with force or is put in fear that force will be used. robbery involves a theft or larceny but is aggravated by the element of force or threat of force.

Volume, Trends, and Rates

There were **124** robberies reported to police in 2015. Five- and 10-year trend data indicated that the number of robberies in 2015 decreased 14.5 percent when compared to 2014 figure. Robbery accounted for **18.0** percent of all violent crimes. The five-year trend data also showed that robbery offenses in 2015 occurred at the rate of **0.7** percent per 1,000 inhabitants.

The type of weapons used in this offense, robbery trends by location, arrests and arrest trends are also included within this section.

Aggravated Assault

Definition

An unlawful attack by one person upon another for the purpose of inflicting severe or aggravated bodily injury. This type of assault is accompanied by the use of a weapon or by means likely likely to produce death or great bodily harm.

The UCR Program considers a weapon to be a commonly known weapon (a gun, knife, club, etc.,) or any other item which, although not usually thought of as a weapon, becomes one in the commission of a crime. The categories of Aggravated Assault (4a-4d) includes assaults or attempts to kill or murder, poisoning, assault with a dangerous or deadly weapon, maiming, mayhem, assault with explosives, and assault with disease (as in cases when the offender is aware that he/she is infected with a deadly disease and deliberately attempts to inflict the disease by biting, spitting, etc.,) All assaults by one person upon another with the intent to kill, maim, or inflict severe bodily injury with the use of any dangerous weapon are classified as Aggravated Assault. It is not necessary that injury result from an aggravated assault when a gun, knife, or other weapon that could cause serious personal injury is used.

It is the practice of local jurisdictions to charge assailants in assault cases with assault and battery, disorderly conduct, domestic violence, or simple assault even though knife, gun, or other weapon was used in the incident. This type of offense is reported to the UCR Program as Aggravated Assault (4a-4d).

Property Crime

Definition

In the Uniform Crime Reporting (UCR) Program, property crime includes the offenses of burglary, larceny-theft, motor vehicle theft, and arson. The object of the theft-type offenses is the taking of money or property, but there is no force or threat of force against the victims. the property crime category includes arson because the offense involves the destruction of property, however, arson victims may be subjected to force. Because of the limited participation and varying collection procedures, only limited data are available for arson. Arson statistics are included in trend, clearance, and arrest tables.

Burglary

Definition

The unlawful entry of a structure to commit a felony or a theft. The use of force to gain entry is not required to classify an offense as a burglary. Burglary is categorized into three subclassifications; forcible entry, unlawful entry where no force is used, and attempted forcible entry.

The UCR Program scores as burglary those offenses locally known as burglary (any degree), unlawful entry with intent to commit a larceny or felony, breaking and entering with intent to commit a larceny, housebreaking, safecracking, and all attempts at these offenses.

Hotel Rule

Burglaries of hotels, motels, lodging houses, and other places where lodging of transients is the main purpose are scored under provision of the Hotel Rule. If a number of dwelling units under a single manager are burglarized and the offenses are most likely to be reported to the police by the manager rather than the individual tenants, the burglary is scored as one offense.

Larceny -theft

Definition

The unlawful taking, carrying, leading, or riding away of property from the possession of another.

Constructive possession is defined as "where one does not have physical custody or possession, but is in a position to exercise or control over a thing".

Larceny and theft mean the same thing in the UCR Program. All thefts and attempted thefts are included in this category with one exception: motor vehicle theft.

Larceny-theft Categories

Pocket- picking

Purse snatching

Shoplifting

Theft From Motor Vehicles

Theft of Motor Vehicle Parts and Accessories

Theft of Bicycles

Theft From Buildings

Theft From Coin Operated Device or Machine

All Other Larceny ---Theft not Specifically Classified

Constructive possession is "control or dominion over a property without the actual possession or custody of it".

Larceny and theft are synonymous in the UCR Program. All thefts and attempted thefts are included in this category with one exception: motor vehicle theft. Because of high volume of motor vehicle thefts, this crime has its own category.

For the UCR Program, agencies report local offense classifications such as grand theft, petty larceny, felony larceny, or misdemeanor larceny as larceny-theft. Also, agencies report all larceny offenses regardless of the value of the property stolen.

Agencies do not classify larceny offenses of embezzlement, fraudulent conversion of entrusted property, conversion of goods lawfully possessed by bailees, lodgers, or finders of lost property, counterfeiting, obtaining money by false pretenses, larceny by check, larceny by bailee, or check fraud. Each of these crimes falls within one of the Part II offense categories.

Motor Vehicle Theft

Definition

The Uniform Crime Reporting (UCR) program, defined motor vehicle theft as the theft or attempted theft of a motor vehicle. The offense includes the stealing of automobiles, trucks, buses, motor bicycles, mopeds, etc. The taking of a motor vehicle for temporary use by a person having unlawful access is excluded from this definition.

Motor Vehicle Theft or attempted theft of a motor vehicle, which the UCR Program defines as a self-propelled vehicle that runs on land surface and not on rails, for example, sport utility vehicles, automobiles, trucks, buses, motor scooters, all-terrain vehicles are classified as motor vehicles. This category does not include farm equipment, bulldozers, airplanes, construction equipment, or water craft (motorboats, sailboats, houseboats, or jetskis). Taking a vehicle for temporary use when prior authority has been granted or can be assumed such as in family situations, rental car agreements, or unauthorized use by chauffeurs and others having lawful access to the vehicle is not classified as motor vehicle thefts.

Motor Vehicle Theft---Autos

The category Motor Vehicle Theft --Autos includes the thefts of all sedans, station wagons, coupes, convertibles, sport utility vehicles, minivans, and other similar motor vehicles that serve the primary purpose of transporting people from one place to another. Automobiles used as taxis are also included.

Motor Vehicle Thefts---Trucks and Buses

The category Motor Vehicle Theft---Trucks and Buses includes the theft of those vehicles specifically designed (but not necessarily used) to commercially transport people and cargo. Pickup trucks and cargo vans, regardless of their use, are included in this category. A self propelled -motor home is considered a truck.

Motor Vehicle Theft---Other Vehicles

The category Motor Vehicle Theft--Other Vehicles includes all other motor vehicles that meet UCR definition such as snowmobiles, motorcycles, motor scooters, trail bikes, mopeds, golf carts, all-terrain vehicles, go-carts, mini-bikes, and motorized wheelchairs.

Arson

Definitions

The Uniform Crime Reporting (UCR) Program, defined arson as any willful or malicious burning or attempting to burn, with or without intent to defraud, a dwelling house, public building, motor vehicle, or aircrafts, personal property of another.

According to the UCR Program's guide-lines, only fires that law enforcement determined to have been willfully or maliciously set may be classified as arson. Participating agencies do not report fires of suspicious or unknown origin.

Arson---- Structural

In classifying the object of arson as structural, as a permanently fixed house trailer or mobile unit used as an office, residence, or storehouse is considered structural property.

Structures are further divided into two subcategories: residential and nonresidential. The UCR Program considers a residential structure to be any dwelling used for human habitation, including houses, townhouses, apartments, etc.. Residential property not meeting the above criteria are classified as Other Residential. Temporary living quarters such as hotel, motels, inns, are nonresidential property and are self-explanatory.

Arson---Mobile

Motor vehicles by UCR definition is self-propelled and run on land surface and not on rails, for example,, sport utility vehicles, automobiles, trucks, buses, motorcycles, motor scooters, all-terrain vehicles, and snowmobiles are classified as motor vehicles.

Arson---Other

The category Arson--Other subcategory encompasses arson of all property not classified as structural or mobile. Willful or malicious burnings of property such as crops, timber, fences, signs, and merchandise stored outside structures are included in this category.

Cautions in Classifying Arson

Key to properly classifying arson is establishing the point of origin of a fire. In cases where the point of origin is undetermined, or in instances of multiple points or origin, the agency reports the structural, mobile, or other category of property that suffered the greatest fire damage.

Section III - Offenses Cleared

Offenses Cleared

Law enforcement agencies reporting crime to the FBI can clear or close the offenses in one of two ways; by arrest or by exceptional means. However, the administrative closing of a case by a local law enforcement agency does not necessarily mean that the agency can clear an offense for UCR purposes. To clear an offense within the Program's guidelines, the reporting agency must adhere to certain criteria, which are outlined in the following text. *(Note: The UCR Program does not distinguish between offenses cleared by arrest and those cleared by exceptional means in its data presentation. The distinction is made solely for the purpose of a definition and not for data collection and publication.)*

Cleared by Arrest

In the UCR Program, a law enforcement agency reports that an offense is cleared by arrest, or solved for crime reporting purposes, when at least one person is:

- Arrested
- Charged with the commission of the offense
- Turned over to the court for prosecution (whether following arrest, court summons, or police notice).

To qualify as a clearance, all of the conditions listed above must have been met. In its calculations, the UCR Program counts the number of offenses that are cleared, not the number of arrestees. The arrest of one person may clear several crimes, and the arrest of many persons may clear only one offense. In addition, some clearances that an agency records in a particular calendar year, such as 2014, may pertain to offenses that occurred in previous years. Additionally, the recovery of property does not clear a case.

Cleared by Exceptional Means

In certain situations, elements beyond law enforcement's control prevent the agency from arresting and formally charging the offender. When this occurs, the agency can clear the offense exceptionally. Elements beyond the law enforcement's control prevent the agency from arresting and formally charging the offender. When this occurs, the agency can clear the offense *exceptionally*. There are four Program requirements that law enforcement must meet in order to clear an offense by exceptional means. The agency must have:

- Identified the offender.
- Gathered enough evidence to support an arrest, make a charge, and turn over the offender to the court for prosecution.
- Identified the offender's exact location so that the suspect could be taken into custody immediately.
- Encountered a circumstance outside the control of law enforcement that prohibits the agency from arresting, charging, and prosecuting the offender.

Examples of exceptional clearances include, but are not limited to, the death of the offender (e.g., suicide or justifiably killed by police or citizen); the victim's refusal to cooperate with the prosecution after the offender has been indentified; or the denial of extradition because the offender committed a crime in another jurisdiction and is being prosecuted for that offense.

Clearances Involving Only Persons Under 18 Years of Age

When an offender under the age of 18 is cited to appear in juvenile court or before other juvenile authorities, the UCR Program considers the incident for which the juvenile is being held responsible to be cleared by arrest, although a physical arrest may not have occurred. In addition, according to Program definitions, clearances that include both adult and juvenile offenders are classified as clearances for crimes committed by adults. Therefore, because the clearance percentages for crimes committed by juveniles include only those clearances in which no adults were involved, the figures in this publication should not be used to present a definitive picture of juvenile involvement in crime.

Section IV Persons Arrested

Persons Arrested

In the Uniform Crime Reporting (UCR) Program, one arrest is counted for each separate instance in which an individual is arrested, cited, or summoned for criminal acts as in Part I and Part II crimes. One person may be arrested multiple times during the year; as a result, the arrest figures in this section should not be viewed as a total number of individuals arrested.

More than one charge could be lodged during each arrest, but only one arrest is counted for each instance. For example, a person may be arrested on several charges at one time, in this situation, only one arrest under the most important offense category as determined by the arresting officer. Likewise, one person may be arrested many times during a month for similar or different violations within a jurisdiction. Because of separation of time between arrests, each arrest is counted separately. In addition, arrest data collected daily are compiled and reported monthly. These reports also provide data on the number of arrests by age, sex, race, and ethnicity.

Race, Sex, and Age

The number of persons taken into custody for an offense is entered according to age and sex. Then the number of persons taken into custody according to race, without regard to sex.

The racial designations are defined as follows:

White ---A person having origins in any of the original peoples of Europe, the Middle East, or North America

Black or African American ---A person having origins in any of the black racial groups of Africa.

American Indian or Alaska Native---A person having origins in any of the original peoples of North and South America (including Central America) and who maintains tribal affiliation or community attachment.

Asian---A person having origins in any of the original peoples of the Far East, Southeast Asia, the Indian subcontinent including, for example, Cambodia, China, India, Japan, Korea, Malaysia, Pakistan, the Philippine Islands, Thailand, and Vietnam.

Native Hawaiian or Other Pacific Islander---A person having origins in any of the original peoples of Hawaii, Guam, Samoa, or other Pacific Islands, e.g., individuals who are Carolinian, Fijian, Kosraean, Melanesian, Micronesian, Northern Mariana Islander, Palauan, New Guinean, Ponapean (Pohnapaian), Polynesian, Solomon Islander, Tahitian, Tarawa Islander, Tokelauan, Tongan, Chuukese, Marshalese, and Yapese.

Section V - Special Reports

Juvenile Offenders

The UCR Program considers a juvenile to be an individual under 18 years of age. Law enforcement agencies do not record an arrest for incidents in which police contact a juvenile who has committed an offense or those situations in which police take juvenile into custody for his own protection, e.g., neglect cases.

The word *arrest* as it applies to juveniles is intended to mean the law enforcement handling of all juveniles who have committed a crime and are taken into custody under such circumstances that, if the juvenile were an adult, an arrest would have been counted. Police contacts with juveniles where no offense has been committed and instances wherein juveniles are taken into custody for their own protection are not included as arrests.

Police include only juvenile violations where police or official action is taken beyond a mere interview, warning, or admonishment. For example, children playing ball in the street who are instructed by an officer to go to the playground for such activity would not be counted as arrested any more than an adult who is only warned against burning leaves on a windy day. Call backs or follow-up contacts with young offenders by officers for the purpose of determining their progress is not counted as arrests. Statistics on juvenile offenders are gathered to measure criminal activity, not juvenile court activity.

Police Disposition of Juveniles (Not Including Neglect or Traffic Cases)

Disposition data in this section are data concerning the law enforcement disposition of juveniles who are taken into custody or arrested. Depending on the seriousness of the offense and the offender's prior criminal record, a juvenile may be warned by the police and released to parents, relatives, friends, or guardians. Juveniles may also be referred to the probation department or some other branch of the juvenile court, to welfare agencies, to other law enforcement agencies, or in the case of serious offenders, to criminal or adult court by waiver of the juvenile court.

The following specific guidelines are entries in the Police Disposition of Juveniles:

1. Handled within the department and released. (Warning, released to parents, etc.).
2. Referred to juvenile court or probation department.
3. Referred to welfare agency.
4. Referred to other police agency.
5. Referred to criminal or adult court.

Drug Abuse Violations

Definition

The violation of laws prohibiting the production, distribution, and/or use of certain controlled substances. The unlawful cultivation, manufacture, distribution, sale, purchase, use, possession, transportation, or importation of any controlled drug or narcotic substance. Arrests for violations of state and local laws, specifically those relating to the unlawful possession, sale, use, growing, manufacturing, and making of narcotic drugs.

The UCR Program collects information on arrests for drug abuse violations based on the narcotics involved. Agencies include all arrests for violations, including attempts, and subdivide the arrests by differentiating between Sale/Manufacturing and Possession.

Sale/Manufacturing

- a. Opium or cocaine and their derivatives (morphine, heroin, codeine)
- b. Marijuana
- c. Synthetic narcotics---manufactured narcotics which can cause true drug addiction (Demerol, methadones)
- d. Dangerous nonnarcotic drugs (barbiturates, benzedrine)

Possession

- e. Opium or cocaine and their derivatives (morphine, heroin, codeine)
- f. Marijuana
- g. Synthetic narcotics---manufactured narcotics which can cause true drug addiction (demerol, methadones)
- h. Dangerous nonnarcotic drugs (barbiturates, benzedrine)

Family Violence

Definition

Unless indicated otherwise, family violence includes all types of violent crimes committed by an offender who is related to the victim either biological or legally through marriage or adoption. A crime is considered family violence if the victim was the offender's current or former spouse, parent or adoptive parent, current or former stepparent, legal guardian, biological or adoptive child, current or former stepchild, sibling; current or former step sibling; current or former step-or-adoptive-grandchild; grandparent; current or former adoptive-grandparent-in-law or other relative (aunt, uncle, nephew, niece).

Statistics on violent crime in the report pertain to all forms of the following crimes; criminal homicide, completed or attempted rape, sexual assault (including threats), robbery, assaults (including threats), kidnapping, intimidation, illegal abortion, extortion, cruelty towards child or wife, hit-and-run driving with bodily injury, and miscellaneous crimes against persons (as opposed to crimes against property).

For statistics on family violence that comes to police attention and for statistics on arrests for family violence, the source used in this report is GPD Arrest Record. Among the various details available on offenders and arrestees are their age, race, gender, and the offenses charged.

Driving Under the Influence

Definition

Driving or operating a motor vehicle or common carrier while mentally or physically impaired as the result of consuming an alcoholic beverage or using a drug or narcotic.

Agencies include in this classification:

- Operating a motor vehicle while under the influence (DUI).
- Operating an engine, train, streetcar, boat, etc., while under the influence

Unlawful Condition of the Driver

The driver whose physical and mental condition is impaired by alcohol is a major contributor of the crash traffic accident problem. Despite the recent reductions in alcohol-related fatalities, alcohol continues to be major cause of crash traffic related deaths.

Alcohol Influence. The driver who has had too many alcoholic beverages is physiologically affected in such a way as to display the following characteristics:

- Impaired judgment
- Relaxed inhibitions and restraints
- Slow reflexes
- Decreased ability to distinguish small differences in light and sound
- Loss of muscular coordination and timing
- Decreased ability to give attention required

Difficulty of Enforcement

Enforcement agencies recognize that the drinking driver is a significant cause of crash traffic accidents. A fundamental reason for difficulties in enforcement is probably the wide social acceptance of alcohol beverages. Because most people use alcohol beverages socially, they tend to feel they cannot be severe with drivers who get into trouble because they drive after drinking. Drinking is a form of celebration enjoyed by many persons -a dangerous practice when coupled with driving a car.

Law Enforcement Personnel

Law Enforcement Personnel

Guam Police Department

The UCR Program defines law enforcement officers as individuals who ordinarily carry a firearm and a badge, have full arrest powers, and are paid from governmental funds set aside specially for law enforcement representatives.

Because of the differing service requirements and functions, care should be taken when using the data presented in this section to draw comparisons between and among the staffing levels of Guam Police Department. What follows is not intended as recommended or preferred officer strength; this data should be viewed merely as guides.

This section of the UCR, 2015 Crime in Guam, presents data as the number and rate of sworn law enforcement officers with the Guam Police Department. The data are broken down by precincts and population. Law enforcement employee rates are expressed as the number of employees per 1,000 inhabitants.

The demographic traits and characteristics of a jurisdiction affect its requirements of law enforcement service. For instance, a business community like the villages of Tamuning, Tumon, and Harmon require more law enforcement presence than a community of the same size that has no urban center nearby. A community with legal gambling (game rooms) may have different law enforcement needs than one near a military base. The needs of a community, like Deeded village, with highly mobile or seasonal population may be very different from village like Mangilao, whose population is relatively stable.

Similarly, the functions of the Guam Police Department are significantly diverse. They patrol local streets and busy highways, they protect citizens in Guam's smallest villages and largest communities. Patrol officers in one area may enforce traffic laws on highways, in another area, they may be responsible for investigating violent crimes. These and other duties have an impact on police staffing levels.
